

# BOIL WATER NOTICE

## MON, June 26, 1 PM

### MONDAY, June 26, 1 PM – NEW UPDATES

- The water station at Cherry Lake Park is extending hours to 6 PM.
- Palisades has been added to neighborhoods under the boil water advisory.
- If you are not receiving text and email updates, sign up at <https://eztxt.net/WBv4hl>.

Crews continue to work on repairs to the water line break. We anticipate having the remaining customers without water restored later today. A boil-water advisory remains in effect for everyone who has experienced no water or low pressure. See more details below. The City is providing 1 case of bottled water to each carload at Cherry Lake Park until 6 PM today. Thanks to Niagara and Kroger for donating water.

\*\*\*\*\*

On Sunday morning, the City of Groveland's Water Plant 3 / Sunshine System experienced a main line break. This break has resulted in a "Boil Water Advisory" to affected residents and businesses of the Sunshine System.

Among the areas affected are the Christopher C. Ford Commerce Park, Trilogy, Estates at Cherry Lake – Southern Ridge, Waterside at the Estates of Cherry Lake, Cherryridge, Crestridge, Bellevue, Parkside, Arborwood, The Vineyard, Wilson Estates, Cherry Lake Oaks, Trinity Lakes, Blue Spring Reserve, Phillip's Lading, US 27 Corridor – Bee's RV Resort and Clerbrook RV resort.

The boil-water alert will remain in effect for 48 hours after the leak has been repaired and pressures are restored. Two consecutive days of bacteriological samples will be required, and the samples must be clear of any contamination before the boil-water notice can be lifted.

**A free water station was established at Cherry Lake Park, 131 Wilson Lake Parkway, beginning 9 AM – 6 PM Monday, June 26, and will be available until the boil-water notification is lifted. 1 case of bottled water per carload. Please do not bring bulk containers.**

This advisory is in the interest of keeping our residents safe while the overall system rebalances with water supplied by the Sunshine Water Treatment Facility located in the northern section of Groveland.

\*\*\*\*\*

Here are guidelines during a Boil Water Advisory:

- ☐ Use bottled or boiled water for drinking, and to prepare and cook food.
- ☐ If bottled water is not available, bring water to a full rolling boil for one minute (at elevations above 6,500 feet, boil for 3 minutes). After boiling, allow the water to cool before use.
- ☐ Boil tap water even if it is filtered (for example, by a home water filter or a pitcher that filters water).
- ☐ Do not use water from any appliance connected to your water line, such as ice and water from a refrigerator.
- ☐ Breastfeeding is the best infant feeding option. If you formula feed your child, provide ready-to-use formula, if possible.

### Handwashing

- ☐ In many cases, you can use tap water and soap to wash hands during a boil water advisory. Follow the guidance from your local public health officials.
- ☐ Be sure to scrub your hands with soap and water for at least 20 seconds. Then, rinse them well under running water.
- ☐ If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.

### Bathing and showering

- ☐ Be careful not to swallow any water when bathing or showering.
- ☐ Use caution when bathing babies and young children. Consider giving them a sponge bath to reduce the chance of them swallowing water.

### Brushing teeth

- ☐ Brush teeth with boiled or bottled water. Do not use tap water that you have not boiled first.

### Washing dishes

- ☐ If possible, use disposable plates, cups, and utensils during a boil water advisory.
- ☐ Household dishwashers generally are safe to use if:
  - ☐ The water reaches a final rinse temperature of at least 150 degrees Fahrenheit (66°Celsius), or
  - ☐ The dishwasher has a sanitizing cycle.
- ☐ Sanitize all baby bottles.
- ☐ To wash dishes by hand:
  - ☐ Wash and rinse the dishes as you normally would using hot water.
  - ☐ In a separate basin, add 1 teaspoon of unscented household liquid bleach for each gallon of warm water.
- ☐ Soak the rinsed dishes in the water for at least one minute.
- ☐ Let the dishes air dry completely before using again.

### Laundry

- ☐ It is safe to wash clothes as usual.

### Cleaning

- ☐ Clean washable toys and surfaces with:
- ☐ Bottled water,
- ☐ Boiled water, or
- ☐ Water that has been disinfected with bleach.

### Caring for pets

- ☐ Pets can get sick from some of the same germs as people or spread germs to people. Give pets bottled water or boiled water that has cooled.
- ☐ If bottled water is not available, bring water to a full rolling boil for 1 minute (at elevations above 6,500 feet, boil for 3 minutes). After boiling, allow the water to cool before use.
- ☐ Boil tap water even if it is filtered (for example, by a home water filter or a pitcher that filters water).
- ☐ Do not use water from any appliance connected to your water line, such as ice and water from a refrigerator.

### Caring for your garden and houseplants

- ☐ You can use tap water for household plants and gardens.
